

EuroChem

# EZY-TIP Fungicide

## Details at a Glance

### Name

EuroChem EZY-TIP Fungicide

### Description

For the control of the adhesion and the penetration of mushroom mycelium in timber trays

### Product type

Fungicide – Group 3

### Active Ingredient and Concentration

250g/L Propiconazole

### Formulation Type and Features

- Emulsion Concentrate (EC)
- Unique Formulation for Australian Conditions

### Pack sizes

5L and 10L

### Manufactured in Australia

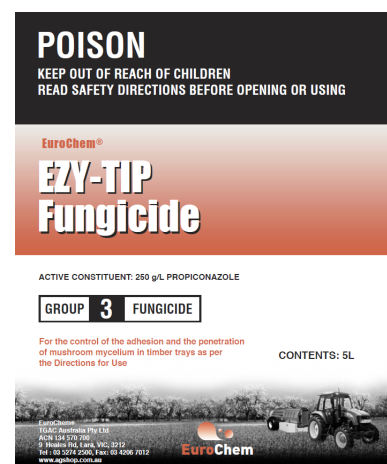

More cost effective, locally produced product

### Registered in Australia

APVMA Approval Number 69604

## Australian Registration

**EuroChem EZY-TIP Fungicide** is registered in Australia for the control of the adhesion and the penetration of mushroom mycelium in timber trays as per the Directions for Use with APVMA Approval Number 69604.

## How does it work?

**EuroChem EZY-TIP Fungicide** is an effective fungicide which controls of the adhesion and the penetration of mushroom mycelium in timber trays. This allows for an easy tip-out of the compost. **EuroChem EZY-TIP** also prevents wood rot and decay of the timber trays. **EuroChem EZY-TIP** is not corrosive to the trays and other parts and steam pasteurization does not decompose the active ingredient.

## Compatibility

Do not mix with other pesticides

## Restrains

None specific but always read the label for full details.

## WITHHOLDING PERIODS

NOT required when used as directed.

TGAC Australia Pty Ltd  
9 Heales Rd, Lara, VIC,  
3212, Australia

## Benefits to the Grower

EUROCHEM EZY-TIP EFFECTS	BENEFITS TO GROWER
Good control of mushroom mycelium and stops penetration of mycelium into timber trays and beds	Allows a fast and easy tip-out of compost, increasing productivity
Easy to disperse and mix, stays emulsified in solution	Gives a uniform dipping solution or a low viscosity spray solution, leading to fast and easy processing
Australian made product – Not imported	General cost savings to the grower

## Directions For Use

SITUATION	RATES PER 100L	CRITICAL COMMENTS
<b>Mushroom Trays and Beds</b>	6mL per litre of water	This rate gives a 1500ppm concentration of the fungicide propiconazole in the water

## Application

See the **EuroChem EZY-TIP Fungicide** Label for full APPLICATION details.

**Before using, always read the product label.**
